GIG World.

An integrated platform that empowers communities to Learn, Share, Connect and Create Value for the Gig Economy

GIGWorld Services & Solutions

GIGWorld App

Innovative social network business solution for Network Marketing Company

GIGWorld App core elements for MLM network

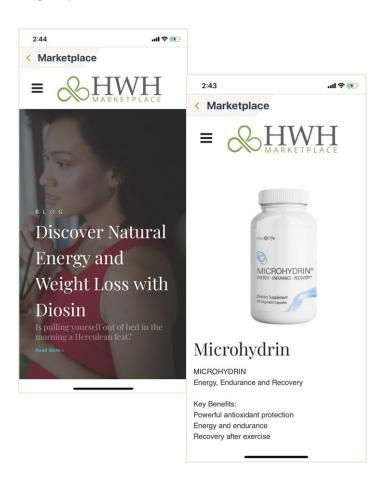

3 keys core elements in GIGWorld App.

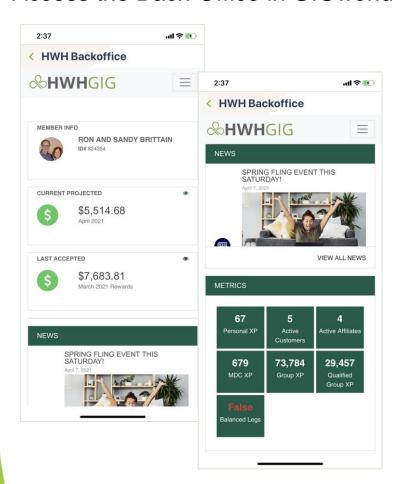

Merge your eCommerce into Mobile App

Generating revenue growth is important. Therefore our team will integrate your Ecommerce website into GIGWorld App.

Leaders, Members and Users can now purchase products directly from GiGWorld app.

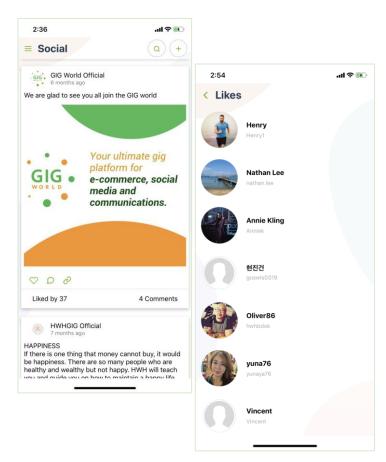

Access the Back-Office in GIGworld

Our work is not done when a sales is complete. We still need to deliver on our promises.

Therefore, GIGWorld app right now has a back office fulfillment system. Because it is mobile, leaders and members can use the back-office system on the go!

Build your own Social Network

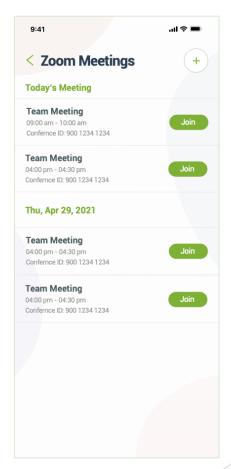

As with all community, continuous engagement is important. Cause if we are out of sight, we are out of mind.

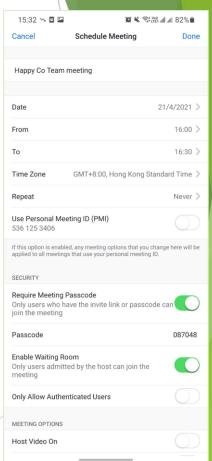

Right now, with GIGWorld app, leaders and members can engage with each other, through direct chats or channels.

Zoom Integration

Users can now create and schedule a Zoom conference call directly through GIGWorld App. The users will be able to view the list of schedules and share the conference call invitations to GIGWorld App Channel.

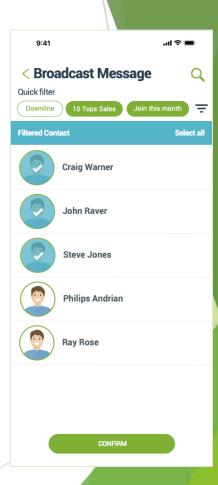

Broadcast Message to Downlines

Sometimes, creating a sense of tribe is key to creating a great team. GIGWorld app now allow leaders to send a messages exclusively only to their downlines.

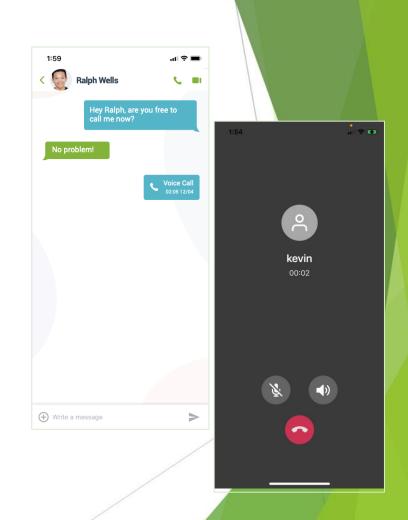

Leaders in the admin level can also further send selective messages to be sent to specific groups in the downline. Like group that are performing or non performing, or from a specific geographic location.

In App Voice and Video Call Features

Whatsapp fatigue, it is a problem especially prevalent in our always on society. To help maintain the mental health of our community, GIGWorld is now able to make voice and video calls in side the app. In addition to the existing features of social chat and channel.

This allows our community to keep their private and work separate. To separate the noise versus signal in communications.
