

An Innovation In Natural Pain Relief Supplement

Traditional painkillers or non-steroidal anti-inflammatory drugs (NSAIDs) are used to kill joint and muscular pain but they are:

- Often associated with a lot of side effects
 - That could lead to cardiovascular problems, strokes, gastrointestinal damage, renal failure, etc.

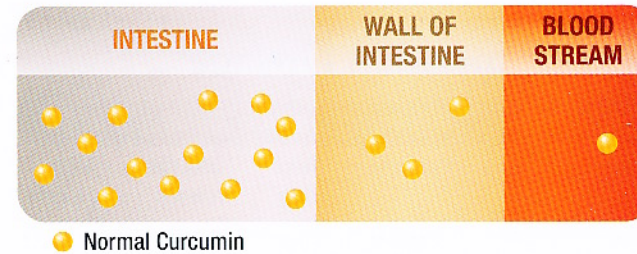

Q-SORB is an effective solution for those who want to manage pain the natural way and a welcome alternative to all the harmful drugs and medication that can cause adverse side effects.

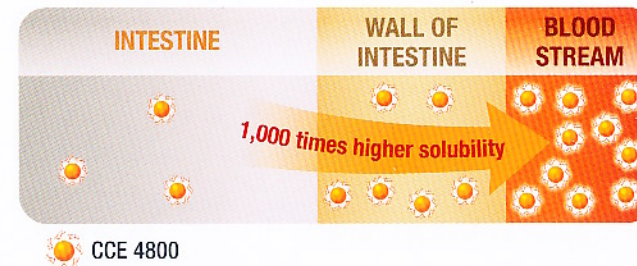

- Developed with a patented Belgian biotechnology called CCE 4800.
- Natural anti-inflammatory with 1,000 times higher solubility.
- Effective relieve of joint and muscular pain.
- Protects cartilage from free radical damage.
- Outstanding safety profile even in the long term.

CCE 4800 — A Breakthrough Patented Belgian Biotechnology

- CCE stands for “Caged Curcumin Extract”.
- Contains curcumin extracted from *Curcuma longa*, commonly known as turmeric.
- Turmeric is one of nature’s most powerful anti-inflammatory agents.
- At its best, the amount of normal curcumin that is absorbed into the blood stream is less than one percent.

- Patented Belgian biotechnology
 - Cages the curcumin molecule in β -cyclodextrin, a polysaccharide (natural starch).
 - Increases solubility of curcumin by 1,000 times.
 - Curcumin is effectively absorbed into the blood stream.

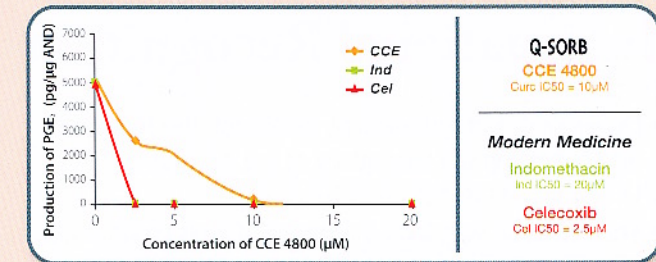

Each **Q-SORB** capsule has the same strength of a 4,800 mg oral dose of pure curcumin – the equivalent of 12 cups of turmeric – for safe and effective management of inflammation, joint and muscular pain as well as arthritis.

Effective Relief For Joint And Muscular Pain

Q-SORB works almost as effective as drugs

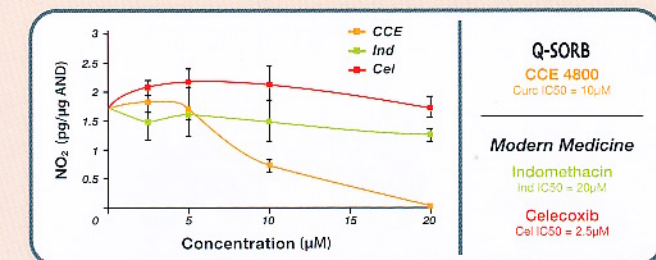

A study published in *Osteoarthritis and Cartilage Vol. 15, Supplement C* in December 2007 has proven that CCE 4800 is capable of bringing down the production of excessive PGE² as the dosage is increased, just like other conventional non-steroidal anti-inflammatory drugs (NSAIDs).

Injuries and everyday wear and tear can place immense stress on your joints and muscles, which causes the body to induce an enzyme called COX-2 that produces excessive PGE², a compound which causes inflammation and pain.

And even better

Compared to drugs, **Q-SORB** brings down the amount of nitric oxide, a form of free radicals in our joints. This prevents the breakdown of cartilage and reduces the chances of having or increasing osteoarthritis.

Free radicals are highly reactive molecules in our body that cause tissue damage at the cellular level. Nitric oxide is produced by our cartilage upon injuries, impacts or mechanical stress.

Safe For Long Term Pain Management

- **Q-SORB** selectively inhibits inflammation.
- Most painkillers like Non-Steroidal Anti Inflammatory Drugs (NSAIDs) are not selective on inflammatory enzymes.
- **Q-SORB** is able to prevent severe side effects*.

* Cardiovascular problems, strokes and gastrointestinal injuries or bleeding.

A World Class Product With International Recognition

- Developed and patented by *bioXtract*, the Research and Development laboratory of the Agronomy University of Gembloux in Belgium.
- The research was led by a group of world renowned arthritis experts, including Professor Yves Henrotin.
- Relieving pain in North America, Europe and Australia since more than six years ago.

Q-SORB is a natural long-term pain relief solution perfect for:

- Arthritic and rheumatoid sufferers.
- Sports enthusiast.

Q-SORB is also effective for:

- Body stiffness or joint and muscular pain due to inflammation, swelling, injuries and accidents.
- Soft tissue injuries due to an active lifestyle.
- Pain due to labour intensive work.

Recommended Dosage

Level of Pain	Quantity	Frequency	Duration	Effect
Severe	1 capsule	Twice daily	Until pain is relieved	Within 1 month
Mild	1 capsule	Once daily	Until pain is relieved	Within 1 month
Pain Management / Prevention daily	1 capsule	Once	Daily	-

You can increase the dosage of Q-SORB when pain is aggravated. Do note that while pain cannot be eradicated permanently, the daily consumption of Q-SORB can keep pain at a minimal level.
